SUMMARY

Full Stack Developer with hands-on experience building scalable web applications end-to-end. Proficient in **React**, **TypeScript**, **Node.js**, **Express**, and **PostgreSQL**, with a strong grasp of REST API design, authentication systems, and real-time features. Comfortable working across the stack — from crafting responsive UIs to architecting secure, performant backends. Passionate about building reliable, user-centric products and eager to contribute to a fast-moving engineering team.

TECHNICAL SKILLS

Frontend: React 18, Next.js, TypeScript, Vite, Tailwind CSS, HTML5, CSS3
Backend: Node.js, Express.js, RESTful APIs, Server Actions (Next.js), MVC Architecture
Databases & ORM: PostgreSQL, MySQL, Prisma ORM, Sequelize, SQL Query Optimization
Security & Auth: JWT, Bcrypt, Google OAuth 2.0, Zod/express-validator, RBAC
Tools & Testing: Git, GitHub, Postman, Vitest, Playwright, Docker (Basics), Socket.io, Firebase
Languages: JavaScript (ES6+), TypeScript, SQL, Java, C++

PROJECTS

- HarmonyHomes** | *React, Node.js, Express, PostgreSQL, Prisma, Socket.io, Firebase* | [\[Live\]](#) | [\[GitHub\]](#) Nov 2025
- Architected a full-stack TypeScript app with **React 18** frontend and **Node.js/Express** backend, managing 14 domain models across households, expenses, chores, events, and communications.
 - Designed a normalized **PostgreSQL** schema with **Prisma ORM**, enforcing multi-tenant data isolation via household-scoped queries and cascade delete constraints across 14 entities.
 - Built an **Expense Splitting Engine** with double-entry bookkeeping for real-time balance aggregation, and a real-time sync layer via **Socket.io** with **Firebase Cloud Messaging** push notifications.
 - Secured endpoints with **JWT**, **Bcrypt**, and **Google OAuth 2.0**; optimized dashboard queries reducing latency by 30%; delivered production-ready infra with Prisma migrations and centralized error handling.
- CartFlow E-Commerce** | *React, TypeScript, Node.js, Express, Sequelize, MySQL* | [\[Live\]](#) | [\[GitHub\]](#) Dec 2025
- Built a full-stack e-commerce platform with a **React/TypeScript** frontend and robust **Express.js** REST API featuring 15+ endpoints for product management and order processing.
 - Integrated **Sequelize ORM** with ACID-compliant transaction logic for orders; handled concurrent cart updates, inventory management, and SQL injection prevention via validation middleware.
 - Wrote unit and integration tests using **Vitest** and **Playwright** to verify API response structures, UI flows, and business logic reliability.
- Synapse Healthcare** | *Next.js 15 (Server Actions), Appwrite, TypeScript, Zod* | [\[Live\]](#) | [\[GitHub\]](#) Jan 2026
- Engineered a secure patient management system using **Next.js Server Actions** for patient registration, appointment booking, and sensitive healthcare data handling with **Zod** schema validation.
 - Implemented **RBAC** with multi-tier authentication (patient/admin dashboards, OTP passkey access) and **Appwrite Messaging API** for automated SMS notifications.

EXPERIENCE

- Poornam Ecovision Foundation** Pune, India
Community Engagement Volunteer July 2024 – December 2024
- Managed data records for large-scale community events, ensuring accuracy and organization.
 - Collaborated with a team of 10+ to coordinate logistics, demonstrating reliability and communication skills.

EDUCATION

- Fergusson College (Autonomous)** Pune, India
Bachelor of Science in Computer Science (Expected 2026) **CGPA: 9.27**
- Relevant Coursework:** Database Management Systems, Operating Systems, Data Structures, Web Development.
